

Examples of Positive Bioenergy and Water Relationships

Africa, Asia and the Pacific and Europe

Activity Group 6 Overview

- **Activity Group 6 (AG6) on “Bioenergy and Water” was established in 2015 under the GBEP Working Group on Capacity Building**
- **The goal of this Activity Group (AG) is to identify and disseminate ways of integrating bioenergy systems into agriculture and forestry landscapes to improve sustainable management of water resources, including waste water**
- **AG6 issued a Call for Good Examples in early 2015 and subsequently held a workshop in August 2015 in which the examples received were presented**
- **The outcome report from that event that was published in February 2016**
- **This webinar is a way to share the knowledge and experiences on best management practices as well as on policies and instruments supporting bioenergy implementation that contributes positively to the state of water**
